

Portfolio Website Documentation

1. Introduction

- **Website Name:** Portfolio
- **Purpose:**

This portfolio website is designed to showcase my skills and projects as a web developer, designer. It serves as an online presence for potential employers, clients, and collaborators.

- **Target Audience:**

This website is intended for:

- Potential clients
- Employers

2. Tech Stack

This section lists the tools and technologies used to build the portfolio website.

- **Frontend:** HTML, CSS.
- **Version Control:** Git/GitHub (link to repository if available)

3. Site Structure and Navigation

- **Homepage:**

Briefly describe the main features of the homepage. For example:

- A welcome message or tagline that defines your profession and focus.
- Quick links to portfolio items, blog (if applicable), and contact information.

- **Portfolio/Projects Page:**

Showcase key projects here, along with descriptions, tech stack, and links to live demos or repositories. Provide images/screenshots of the projects.

- **About Page:**
- Includes services , skills , about and contact details .
- **Contact Page:**

This section should allow users to reach out via a contact form, email, or social media links.

4. Features

- **Responsive Design:**

The website is fully responsive and adapts to different screen sizes (mobile, tablet, desktop).

- **SEO Optimization:**

The website is optimized for search engines with relevant meta tags, descriptions, and proper use of headings.

- **Accessibility:**

Implemented accessibility best practices (e.g., alt tags, ARIA roles, keyboard navigation).

- **Animation/Interactive Elements:**

The user can add his email in the enter the email section and the person will be contacted within 24 hours through email.

- **Performance Optimization:**

Techniques such as image optimization, and minified CSS files are used to improve site performance.

4. Customization

Instructions on how to modify the website for personal use:

- **Changing Styles:** You can use the style.css file to change font background or to align any stuff of the webpage
- **Adding Projects:** Guide users on how to add new projects to the portfolio.
- **Updating Content:** Anyone can update the contents styling as well as the background and fonts using any editor apps like notepad , VScode.

7. Known Issues and Future Improvements

- **Known Issues:** The Website currently can take response upto 500 audience but will be able to hold much more load in the future.
- **Future Improvements:** More projects will be showcased in the future.
